SUMMARY

Let's create a product together that delights users and drives results.

Dedicated UI designer and front-end developer with over 15 years of experience creating user-centric digital products. Skilled in designing intuitive user interfaces and developing scalable, high-performance applications that align business goals with user needs. Experienced in collaborating across disciplines to deliver cohesive, impactful solutions that meet modern industry standards.

A few of my personal qualities…

- Collaborative
- Results-driven
- Detail-oriented
- Professional
- Self-motivated
- Organized
- Problem-solver
- Adaptable

PROFESSIONAL EXPERIENCE

The Church of Jesus Christ of Latter-day Saints
June 2018 – Present

Senior Frontend Developer

Designed and developed a large-scale financial application used by over 200 accountants worldwide, enabling efficient management of donations, transactions, and fund reconciliation processes.

- Modernized the application's user interface through a design refresh, improving usability by 25% based on feedback from internal usability testing and aligning with updated brand guidelines.
- Constructed a reusable component library that improved developer efficiency saving an estimated $2MM in overall development savings over the duration of the project and reduced feature delivery time by 30%.
- Implemented coding standards with ESLint and Prettier, resulting in a 25% reduction in code review time and improved code consistency.
- Collaborated with cross-functional teams and mentored junior developers to deliver features, fix defects, and improve Agile workflows.

Verizon Wireless
June 2017 – June 2018

Senior Software Engineer / UI Designer

Produced a React-based design system and frontend application from the ground up, improving feature development speed by 40%.

- Optimized dashboard performance, reducing load times by 30% and increasing operational efficiency for internal teams.
- Designed scalable and reusable components, ensuring consistent design across applications and platforms.
- Partnered with stakeholders to prioritize features, ensuring alignment with business goals and user needs.

Intuit
April 2016 – June 2017

Senior Software Engineer / UI Designer

Migrated a legacy financial tool from AngularJS to ReactJS, improving application performance, maintainability, and user satisfaction scores by 18%.

- Enhanced client-accountant collaboration by designing and implementing intuitive document-sharing features.
- Streamlined development workflows by refactoring legacy code and introducing reusable UI components, reducing technical debt by 50%.
- Worked closely with designers and product managers to deliver accessible, user-focused interfaces compliant with WCAG 2.0 standards.

SolutionStream
July 2014 – April 2016

Senior UI/UX Designer & Developer

Delivered tailored UI/UX solutions for diverse industries, helping clients improve user engagement and achieve business objectives.

- Designed and developed responsive web applications using AngularJS and JavaScript, increasing mobile traffic by 20% for key clients.
- Led design and development efforts for high-traffic websites, ensuring timely delivery and alignment with client requirements.
- Collaborated with teams across disciplines to create user-centric designs and implement modern web technologies.

USANA Health Sciences
December 2013 – July 2014

Senior UI/UX Design & Development
Led an effort to redesign the sales associate portal, creating a unified design system that improved user engagement by 20%.

- Developed responsive and accessible web interfaces using modern frameworks that supported cross-browser compatibility and consistency.
- Standardized design processes and templates to ensure cohesive branding across all digital platforms.

Ancestry.com
March 2013 – December 2013

Senior UI/UX Designer
Led UX/UI design and development for in-library research tools, delivering a more accessible and user-friendly interface for genealogical research.

- Created wireframes, prototypes, and high-fidelity mockups to test and refine user flows based on feedback from usability testing.
- Collaborated with developers to implement scalable solutions that improved user satisfaction.

Others Include

KiN2.me, MediaFire, and University of Texas at Houston

OTHER PROJECTS

CodeEdit
March 2022 – Present

Founder & Lead Developer
Founded and led the development of CodeEdit, an open-source macOS code editor with over 20,000 stars on GitHub, designed to deliver high performance and a seamless user experience.

- Designed and implemented core editor features, adhering to Apple's Human Interface Guidelines and leveraging SwiftUI and AppKit.
- Scaled the project by creating modular Swift packages, enabling code reuse across the app ecosystem and improving development efficiency.
- Grew a thriving community of 100+ contributors by mentoring developers, hosting weekly planning sessions, and managing project milestones.
- Established a robust project architecture to support seamless feature integration and long-term scalability.

SKILLS

Development

- Frontend Development
- iOS Development
- macOS Development
- JavaScript
- TypeScript
- React

- Next.js
- Node.js
- Swift
- SwiftUI
- GraphQL
- REST APIs

- Git
- GitHub
- HTML5
- CSS3
- Visual Studio Code
- Xcode

Design

- Figma
- Sketch
- Photoshop
- Illustrator

- After Effects
- UX/UI Design
- Motion Graphics
- Wireframing

- Prototyping
- Visual Design
- Responsive Design
- Design Systems

Other Skills

- Leadership
- Team Player
- Collaboration
- Mentorship

- Code Review
- Project Management
- Requirements Specification
- Technical Documentation

- CI/CD Automation
- Workflow Optimization
- Release Management
